

DOT Medical Clearance Request

Atrial Fibrillation / Atrial Flutter

In accordance with Federal Motor Carrier Safety Administration (FMCSA) guidelines, we respectfully request your professional opinion regarding this driver's ability to safely operate a commercial vehicle given their history of **Atrial Fibrillation / Atrial Flutter**. The medical examiner will use your clinical input to determine whether this driver's condition and treatment are unlikely to interfere with the ability to safely operate a commercial motor vehicle.

PATIENT NAME	DATE OF BIRTH

FMCSA Guidelines — Atrial Fibrillation / Atrial Flutter

For certification, please confirm:

- **Rhythm type:** atrial fibrillation, atrial flutter, or both
- Driver is currently asymptomatic with a controlled heart rate
- Driver is adequately anticoagulated to decrease the likelihood of stroke, if applicable
- Treatment has been shown to be adequate, effective, safe, and stable
- Driver has been evaluated and treated by a cardiovascular specialist
- **If atrial flutter treated with post-isthmus ablation:** minimum 1-month waiting period has been completed and driver is asymptomatic
- **If atrial fibrillation with cardioversion or ablation:** minimum 1-month waiting period has been completed

The following are disqualifying:

- Any symptoms likely to cause syncope, loss of consciousness, or compromised cerebral function
- Uncontrolled heart rate
- Inadequate or non-therapeutic anticoagulation in a driver with stroke risk factors
- Any underlying condition that is independently disqualifying
- History of sudden death resuscitation associated with the arrhythmia

Commercial Driver Physical Demands

Commercial motor vehicle operation places substantial physical demands on drivers that extend well beyond the act of driving. Drivers are routinely required to load and unload cargo, couple and uncouple trailers requiring full range of motion to climb, grip, and pull, lift and install tire chains weighing between 35 and 90 pounds, and tarp open trailers requiring lifting motions of 50 to 100 pounds — often after extended periods of sitting without a stretching period. In addition to these labor demands, drivers must maintain sustained perceptual alertness, control an oversized steering wheel, operate manual transmissions, maneuver large vehicles in confined spaces, and safely enter and exit the cab, which is physically comparable to climbing a ladder. These combined physical and cognitive demands should be carefully considered when determining this driver's fitness for commercial driving duties.

DOT Medical Clearance Request

Atrial Fibrillation / Atrial Flutter

Provider Certification

- ☐ **CLEARED** — The driver meets the above requirements and in my clinical opinion is medically cleared to safely operate a commercial motor vehicle.
- ☐ **NOT CLEARED** — The driver does not meet the above requirements and in my clinical opinion cannot safely operate a commercial motor vehicle at this time.
- ☐ **CLEARED WITH DISCRETION** — The driver does not meet one or more guidelines; however, in my clinical opinion the driver is safe to operate a commercial motor vehicle for the following reason(s):

PROVIDER NAME (PRINT)
