

DOT Medical Clearance Request

Migraine / Headache Disorder

In accordance with Federal Motor Carrier Safety Administration (FMCSA) guidelines, we respectfully request your professional opinion regarding this driver's ability to safely operate a commercial vehicle given their history of **Migraine / Headache Disorder**. The medical examiner will use your clinical input to determine whether this driver's condition and treatment are unlikely to interfere with the ability to safely operate a commercial motor vehicle.

PATIENT NAME	DATE OF BIRTH

FMCSA Guidelines — Migraine / Headache Disorder

For certification, please confirm:

- Confirmed diagnosis including **migraine type** (episodic, chronic, vestibular, hemiplegic, basilar-type, or other), date of diagnosis, and current treating provider
- Current **migraine frequency** (headache days per month) and whether the pattern is episodic (<15 days/month) or chronic (≥15 days/month)
- Whether the driver typically experiences **adequate premonitory warning** (aura, prodrome, or other premonitory symptoms) allowing sufficient time to safely stop a commercial motor vehicle before onset of disabling symptoms
- Current **acute and prophylactic medication regimen** with medication names, doses, and frequency; provider attestation that medications at current doses do not cause sedation, cognitive impairment, or psychomotor slowing during working hours
- Clinical opinion regarding whether this driver's migraine condition, frequency, and current treatment regimen are compatible with the **safe operation of a commercial motor vehicle**

The following are disqualifying:

- Any history of **loss of consciousness** during a migraine attack
- Hemiplegic migraine with **motor weakness or paralysis** during attacks
- Basilar-type migraine with brainstem symptoms (**diplopia, dysarthria, vertigo, or collapse**) during attacks
- Migraine with **seizure triggered by migraine**
- Regular or frequent use of **butalbital-containing compounds** (Fioricet, Esgic) or opioids for acute migraine management — both carry significant CNS sedation and medication overuse risk incompatible with CMV operation
- Prophylactic medications (**topiramate, valproate, amitriptyline**) causing sedation, cognitive slowing, or psychomotor impairment at current dose that interferes with safe vehicle operation

Commercial Driver Physical Demands

Commercial motor vehicle operation places substantial physical demands on drivers that extend well beyond the act of driving. Drivers are routinely required to load and unload cargo, couple and uncouple trailers requiring full range of motion to climb, grip, and pull, lift and install tire chains weighing between 35 and 90 pounds, and tarp open trailers requiring lifting motions of 50 to 100 pounds — often after extended periods of sitting without a stretching period. In addition to these labor demands, drivers must maintain sustained perceptual alertness, control an oversized steering wheel, operate manual transmissions, maneuver large vehicles in confined spaces, and safely enter and exit the cab, which is physically comparable to climbing a ladder. These combined physical and cognitive demands should be carefully considered when determining this driver's fitness for commercial driving duties.

DOT Medical Clearance Request

Migraine / Headache Disorder

Provider Certification

- ☐ **CLEARED** — The driver meets the above requirements and in my clinical opinion is medically cleared to safely operate a commercial motor vehicle.
- ☐ **NOT CLEARED** — The driver does not meet the above requirements and in my clinical opinion cannot safely operate a commercial motor vehicle at this time.
- ☐ **CLEARED WITH DISCRETION** — The driver does not meet one or more guidelines; however, in my clinical opinion the driver is safe to operate a commercial motor vehicle for the following reason(s):

PROVIDER NAME (PRINT)

SPECIALTY / TITLE

DATE

PROVIDER SIGNATURE

ADDRESS (CITY, STATE, ZIP)

PHONE / FAX

This form must be completed and signed prior to the scheduled examination date. A physician office stamp is strongly recommended to validate the authenticity of this document. Incomplete or unstamped forms may delay the certification process. Thank you for your cooperation in supporting the safe operation of commercial motor vehicles on our nation's roadways.
